

***We've got you covered***

***...If your dull, chalky  
metal building could use a restoration.***

**X-PROTECT** OXIDIZED METAL has excellent UV resistance to retain color and restore old looking, oxidized metal surfaces. In most cases, **X-PROTECT** OXIDIZED METAL provides ease of cleaning and restores most surfaces to life for years to come.

xGen develops and enhances coatings with advanced technology for proven results.

OXIDIZED METAL  
CLEAR

XGEN COATING SYSTEM™

# X-RESTORE® OXIDIZED METAL

CLEAR

Available in Clear

- Leading-edge protection for all decorative non-ferrous metals, including aluminum, copper, brass, bronze, nickel, galvanized surfaces, oxidized painted surfaces and stainless steel.
- Provides a “one-and-done” coating that will prevent metals from corrosion, tarnishing and staining.
- Materials that have been coated will be easy to clean, and will prevent finger prints and streaking from most harsh chemicals (excluding high alkalines).
- Materials can be maintained with pH Neutral cleaners

## PRIMARY BENEFITS

- Save effort *and* money: Saves overall exterior building maintenance
- Enhances the shine of old worn metals to like-new in most cases
- Provides corrosion protection (ASTM B117 – 4,000+ hours tested)
- Resistant to salt-spray and most harsh chemicals
- UV stable and non-yellowing
- Withstand over 2,000 Degrees
- Applied at 0.1-0.3 mil DFT – EPA Compliant
- Glass-like surface repels moisture, oil and dirt
