

XGEN COATING SYSTEM™

X-PROTECT®
VINYL & LINOLEUM

HIGH GLOSS &
QUICK-DRY SEMI-GLOSS

xGen develops and enhances coatings with advanced technology that has proven results. X-PROTECT is an acrylic urethane that will replace traditional waxed VCT floors.

How do we know? Simply determine the cost for maintaining your VCT floors on an annual basis, then multiply that number by 3, 4, or 5 years, which would be the life of X-PROTECT, depending on floor traffic.

TRADITIONAL WAX			X-PROTECT		
Year 1	\$1.60	\$16,000	Year 1	\$3.25	\$32,500
Year 2	\$1.60	\$16,000	Year 2	\$.25	\$ 2,500
Year 3	\$1.60	\$16,000	Year 3	\$.25	\$ 2,500
Year 4	\$1.60	\$16,000	Year 4	\$.25	\$ 2,500
Year 5	\$1.60	\$16,000	Year 5	\$.25	\$ 2,500
TOTAL		\$80,000	TOTAL		\$42,500

SAVINGS OF 47%*

**The above figures are estimates based on a 10,000 square-foot floor, waxed twice per year. Estimates for applied cost are for example only, and ROI can differ from above illustration.*

PRIMARY BENEFITS

- Less workplace interruptions
- Harder material than wax
- Environmentally friendly
- Low VOC
- Easy to maintain
- Scuff and Scratch resistant
- Chemical resistant
- Retains gloss for years
- Annual savings vs. wax floors
